IN LATE MEMORY OF (LATE SHRI SHAKTI VINAYAK JI)

The star and founder of Master which is the parent brand of Kiko picket fence. He put his entire life at work. The most talented and hardworking man we have known. A true idol for everyone who is a part of us and that his works done always motivate us, everyday, to keep going, to keep shining as he did in his work. You will always be a part of us! We thank you for everything.

TEAM WORK MAKES THE DREAM WORK

FOUNDER

(MR. AMIT VINAYAK)

Kiko picket fence was introduced by Engineer Amit Vinayak who has remarkable knowledge of everything in his field of work. The story behind Kiko was very lame and sudden as Kiko fence was made to replace fences in a way they became durable and the finishing was different to the one we commonly find in wood or metal. It was back in 2018 when he just gave it a try. Here I would like to mention Mr. Amit is basically an engineer but not just engineering he created a product which is technically good as well looks beautiful and makes your green space matter to you even more. So, he has an artist in him. Once he developed the product after his first prototype he was sure this product would replace any material used for fencing. So, since day one his motive has been toward making Kiko a global company. And the response is visible Kiko has expanded its work a lot till date. We are leading suppliers not just in different states in India but Overseas as well. A big thanks to Mr. Amit for always pushing us towards victory. Who knew the trail would make such an amazing product which would change any garden worth an English garden, a space where kids love to be, the adults sit to relax and of course, the rest enjoy its beauty too. Thankful and grateful to him.

MARKETING HEAD

(MS. GARIMA VINAYAK)

An interior designer and an artist by heart. Since day one her motive has been to create numerous of gardens and not just create a garden but later taken care of, for which any garden with fence would be the perfect idea. So main marketing head of Kiko holds the company with high global reach where she makes it a point to give knowledge of the product and its value first and then be opted for or purchased. We thank her to not just promote Kiko and market fence but also after services or issues of the client to resolve and fully complete the installations. Completing every order till installation.

OPERATION MANAGER

(MR. SHIV KUMAR)

A man who manages the entire company, an all rounder, technical knowledge he has is undoubtedly amazing. From starch till forming the product and dispatch he is the man behind all of it! Here I would like to give credit to him on making KIKO a well named brand of fence. Thanks to the operation team and the entire system he manages to continue to make KIKO PICKET FENCE grow and expand and satisfy our clients in every way possible.

ABOUT US

At KIKO Picket Fence, we are a specialized unit equipped with modern technologies to bring style and sophistication to your property. Our offerings elegance, adding a touch of charm to your surroundings. We take pride in our dedicated team of brilliant engineers, skilled machine operators, and designers who are not only passionate but deeply believe in our craft.

Enhancing Fencing Excellence

In the last decade, Fibre Reinforced Polyester (FRP) fencing has established a remarkable global presence. This surge is attributed to the scarcity of quality timber and the versatility of FRP's properties. As we acknowledge the environmental impact of traditional preservation methods, we've made it our mission to reduce carbon emissions. Our commitment is fortified by efficient practices and the use of eco-friendly materials in crafting our products.

A Green Vision

Exporting to numerous countries, we continue to evolve within the fencing market. Our approach is customer-centric; we listen to your needs, not just our own perceptions. All our fences are locally produced, positioning us as a leading FRP fencing manufacturer in India.

AGRICULTURE FENCE

To prevent animals and plants in the agricultural areas fencing is required. Our fence is strengthful, shock proof, washable hence most successful in the agriculture land.

Fencing in the agricultural area is needed for a number of reasons, which includes protection to the livestock, it is easy to manage the farmland after fencing.

SWIMMING POOL FENCE

The swimming pool boundary can be your backyard fence or a barrier that is suitable to be classified as a boundary fence.

A residential pool can be a great source of enjoyment and refreshment, but it can also pose significant risks, particularly for children who are captivated by water but who lack swimming skills.

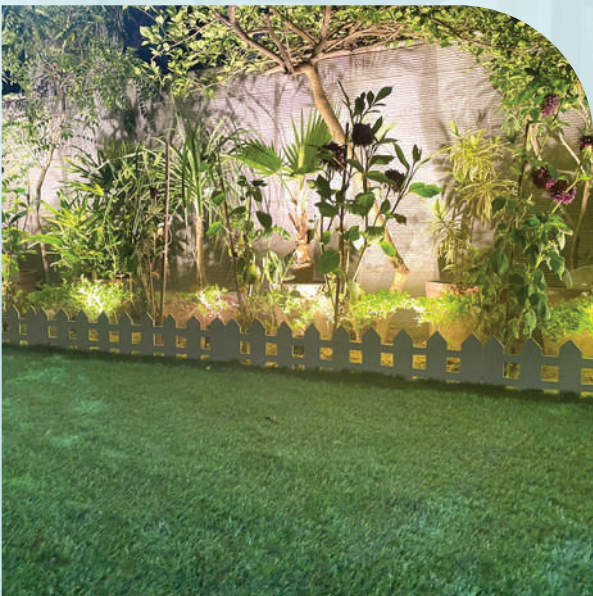

Fibre pool fences are durable, easy to clean and offer a huge range of styles to choose from. Moreover, This plus their affordable cost makes them a very popular choice for most homeowners. Fibre fencing is low maintenance, five times stronger than wood, and won't decompose, rust, blister, rot, or peel.

Kiko provides you with the best quality Fibre fences which has all the above quality.

Also its makes your area more interesting and beautiful.

Garden Fence

Fence in the garden keeps the inside in and the outside out. So, we help you organise the smallest and the largest area of the garden. The beauty behind adding fence to your garden is how it can complement your home on an aesthetic level.

So, garden fence enhance the quality of life, as we believe that every outdoor space has the potential to be transformed into a unique and inspiring sanctuary.

VILLA FENCE

Fences for villas serve multiple functions within a property's perimeter. Firstly, they act as protective barriers. Additionally, they serve as essential decorative elements since they are the first things visitors see. We guarantee that Kiko's FRP fence will enhance the beauty and attractiveness of your property. Our product is of the highest quality, and we do not compromise on it."

Front Yard And Back Yard Fence

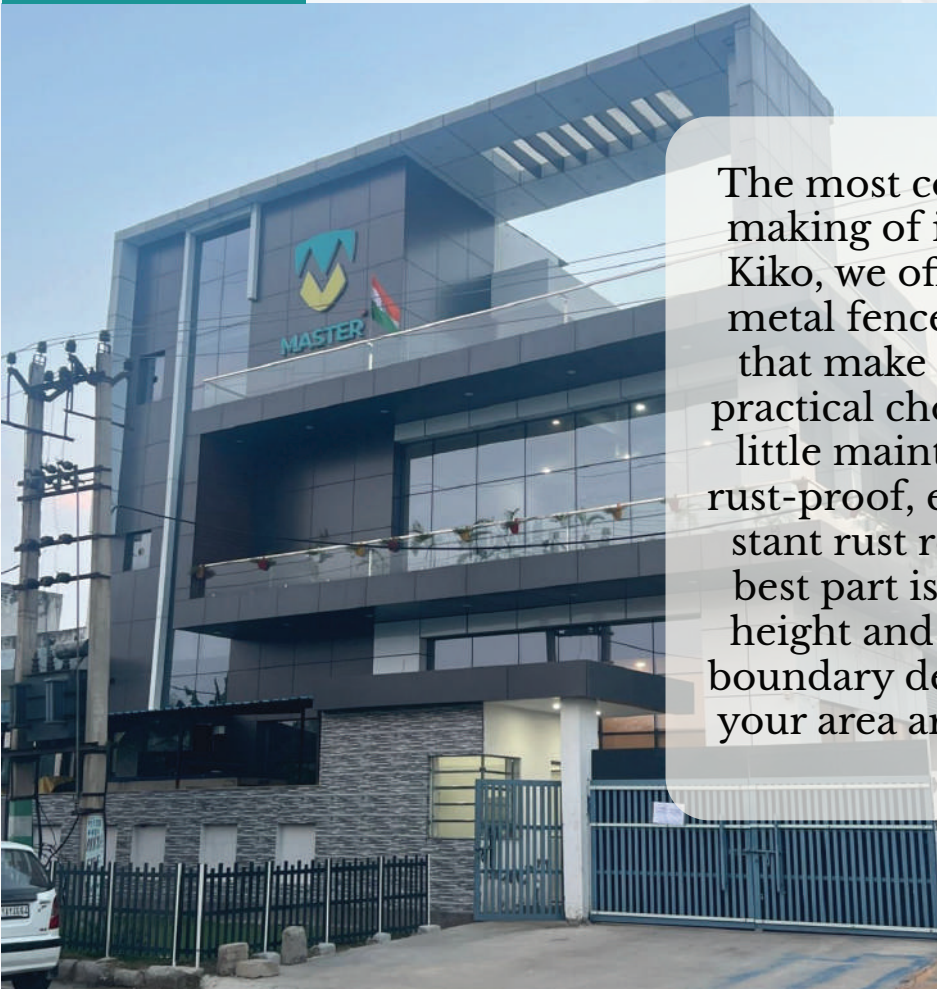

We at Kiko Connect you with nature, we guide you to build a yard whether you use a pergola or a trellis to keep on looking out and a peace of mind in.

The best fence will depend on the homeowner's goals for the fence and their yard.

To create a seamless transition from the house to the front yard/back yard, fencing in similar colour would be great. Fence maintains the continuity and ensure the landscaping matches your home. Kiko fence is a low maintenance option, great for anyone who doesn't have hours to spend on the upkeep of the yard.

INDUSTRIAL FENCE

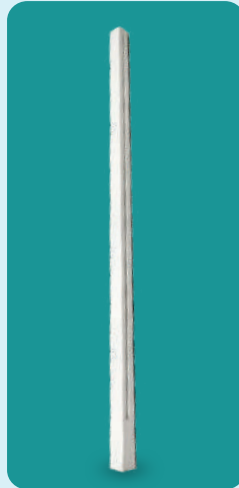

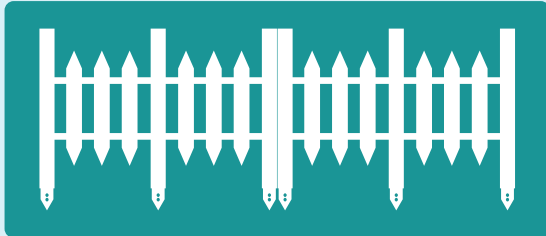

The most common material used in the making of industrial fences is metal. At Kiko, we offer the same qualities as any metal fence but with added advantages that make our industrial fence a more practical choice. Our fences require very little maintenance and are completely rust-proof, eliminating the need for constant rust removal and repainting. The best part is that you can customize the height and width of your fence. Safety, boundary definition, and organization of your area are our top priorities with our fiber fences

For the past few years, Kiko has been motivating industries to replace their metal and mesh fences with our fiber fencing. In the present time, there is a need for a good exterior look, along with the architectural aesthetics of the industry. Our fences give you both quality and aesthetics.

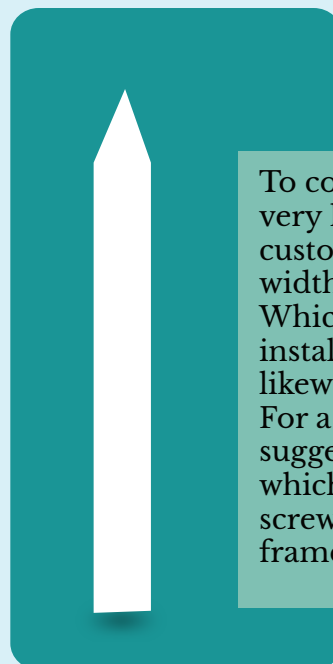

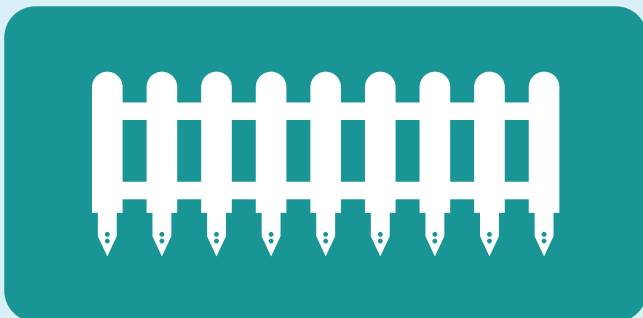

Cemented Area Fence Installation Accessories

Muddy Area Fence Installation

SPIKED FENCE INSERTED WITH CEMENT

To cover the boundry of a very large area Pickets with custom - built Height and width are made at kiko . Which are very easy to install and give clean and likewise look as of fence. For a very tall height we suggest to use pickets which can easily be screwed on a metal or fibre frame
